

Soporific Ambience Camping Lantern **CL3**

Embrace nature, relish serene slumber

Soporific Ambience Camping Lantern

The KLARUS CL3 sleep-inducing ambient camping lantern is compact and elegant, available in ivory white and light spruce green, weighing 201.5g. It features 6 5730 LED beads and 12 2835 LED beads, with a maximum brightness of 280 lumens and a maximum illumination area of 153.94 square meters. It offers 3 color temperatures (300K orange, 2700K warm, and 4000K white), with 4 adjustable levels to suit various environments. The IPX5 waterproof rating and 360° metal mesh protection ensure durability. Powered by an 18650 lithium battery, it lasts up to 13 hours on low brightness.

Features:

- CL3 camping lantern's pulse mode is designed for sleep assistance, with a unique brightness cycle to regulate the parasympathetic nervous system, ensuring a restful sleep outdoors.
- High-quality, flicker-free LED beads suppress current fluctuations and eliminate low-frequency filtering, ensuring eye comfort during extended use.
- 3 color temperatures with 4 adjustable levels provide various lighting options, doubling as an ambient light and combining practicality with aesthetics.
- A strong magnetic top, flexible hanging hook design, and standard threaded hole at the bottom offer versatile mounting options for increased usability.
